# Most important developments in 6 research workflow phases

	Discovery	Analysis	Writing	Publication	Outreach	Assessment
Trends	social discovery tools	datadriven & crowdsourced science	collaborative online writing	Open Access & data publication	scholarly social media	article level (alt)metrics
Expectations	growing importance of data discovery	more online analysis tools	more integration with publication & assessment tools	more use of “publish first, judge later”	use of altmetrics for monitoring outreach	more open and post-publication peer review
Uncertainties	support for full-text search and text mining	willingness to share in analysis phase	acceptance of collaborative online writing	effect of journal/publisher status	requirements of funders & institutions	who pays for costly qualitative assessment?
Opportunities	discovery based on aggregated OA full text	open labnotes	semantic tagging while writing/citing	reader-side paper formatting	using repositories for institutional visibility	using author-, publication- and affiliation-IDs
Challenges	real semantic search (concepts & relations)	reproducibility	safety/privacy of online writing	globalization of publishing/access standards	making outreach a two-way discussion	quality of measuring tools
Most important long-term development	multidisciplinary + citation-enhanced databases	collaboration + data-driven	online writing platforms	Open Access	more & better connected researcher profiles	importance of societal relevance + non-publication contributions
Potentially most disruptive development	semantic/concept search + contextual/social recommendations	open science	collaborative writing + integration with publishing	circumventing traditional publishers	public access to research findings, also for agenda setting	moving away from simple quantitative indicators

# Plagiate

"Als **Plagiat** bezeichnet man allgemein die **bewusste Aneignung fremden Geistesgutes**. Plagiator ist derjenige, der ein fremdes Werk oder Teile eines fremden Werkes als sein eigenes Werk ausgibt und somit "geistigen Diebstahl" begeht. Der Plagiator begeht eine zivilrechtlich unerlaubte und zum Schadensersatz an den Autor verpflichtende Handlung, die gleichzeitig auch noch strafbar ist. Der Plagiator ist also derjenige, der seinen Text wörtlich bei einem anderen Urheber abschreibt, ohne ihn korrekterweise zu zitieren, um anschliessend dieses Werk als sein eigenes geistiges Eigentum wieder herauszugeben."

## Highlights

- A temporal upscaling concept is proposed to study SUHI.
- A more representative climatology of clear sky SUHI is derived.
- Urbanization tends to enlarge the amplitude of annual daytime LST series.
- Urbanization-induced variation in diurnal LST range is city- and climate-related.

## Abstract

The relationship between Geography and Area Studies remains fraught but crucial, as it highlights at least three imperatives we cannot do without: to decolonize disciplinary Geography, to forge more egalitarian and sustainable relations of knowledge production and to foreground enduring differences of life 'elsewhere' represented in novel forms. I argue that these imperatives require an Area Studies ethos, and that the longer Geography as we know it remains aloof from such imperatives, its days as an art or science of broader value are numbered.
